agabrielarcangel.github.io/portfolio/

Profile

Full-stack developer experienced in Laravel and React/TypeScript applications, focused on reliable product features for business-heavy web platforms across frontend, backend, and integrations.

Technical Skills

Frontend

React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, ShadCN, TanStack Query, React Hook Form, Zod, Zustand

Backend

PHP, Laravel, REST APIs, validation, auth/access control, testing, Node.js, Express.js, Python

Data & Tools

MySQL, PostgreSQL, SQL, Git/GitHub, Docker, Vite, JWT, L^AT_EX, MATLAB

Core Strengths

- SaaS workflows, billing logic, and access control
- API-driven product development and cross-app integration
- Frontend implementation and responsive UI polish
- Turning business requirements into shipped features

Education

B.S. Applied Physics

University of Santo Tomas
2021 – 2025

Focus

- Subscription and billing experiences
- Admin settings and configuration flows
- Validation, testing, and product quality

Strengths

- Comfortable across frontend, backend, and API integration work
- Strong attention to usability, implementation detail, and product polish
- Experienced in shipping features within collaborative development teams

Experience

Full-Stack Developer Remote Freelance Work June 2025 – Present

Tech Stack: Laravel, PHP, React, TypeScript, Tailwind CSS, REST APIs, MySQL, Vite

- Built multi-step billing and subscription flows in a practice-management web application using React and TypeScript.
- Implemented Laravel endpoints and validation for dynamic pricing, billing configuration, and add-on management.
- Improved access control, redirect handling, shared API integrations, and backend test coverage for billing-related changes.
- Supported accounting and operations workflows in invoices, client sync, and admin settings modules.

Junior Backend Developer Beth Aven Dec 2024 – May 2025

Tech Stack: PHP, Laravel, MySQL, REST APIs, JavaScript, Git

- Contributed to an e-commerce website through backend feature development and supporting integrations.
- Helped implement server-side functionality for smoother shopping and site management workflows.

Junior Developer HPL Game Design 2025

Tech Stack: HTML, CSS, JavaScript, React, Responsive UI Development

- Developed user-facing interface components with focus on responsive layouts, usability, and visual consistency.
- Translated design requirements into functional frontend features and iterative UI improvements.

Full-Stack Developer Intern NexVision 2023

Tech Stack: HTML, CSS, JavaScript, PHP, SQL, REST APIs, Git

- Supported full-stack web development across frontend and backend tasks, including implementation, debugging, and feature updates.
- Worked on UI improvements, API integration, and database-backed functionality in a team environment.
